

TRUCK FUNCTIONAL MODEL

Product number

FMTRUCK01

Fully operational 7.5-ton truck modified for use as an automotive training stand. Equipped with a EURO 6 diesel engine and full pneumatic braking system featuring Electronic Braking System (EBS). Integrated with measuring boxes for real-time diagnostics of engine and EBS electronic systems. Includes open electrical contacts and complete wiring diagrams for hands-on learning. Features built-in fault code simulation for both engine and EBS control units. Suitable for advanced automotive education and diagnostic training.

Features

- Fully functional 7.5T truck used as a training stand.
- EURO 6 diesel engine with active engine management system.
- Complete pneumatic brake system with Electronic Braking System (EBS).
- Engine and EBS measuring boxes with open contacts.
- Full system wiring diagrams included.
- Fault simulation for engine and EBS ECUs.
- Live component access: sensors, actuators, ECUs, relays, fuses.
- Compatible with professional automotive diagnostic tools.
