

# DIESEL ENGINE ¼ CUTAWAY EDUCATIONAL TRAINER

A1

Product number  
IVOD01-Q

Cutaway diesel engine trainer designed for educational purposes, showcasing internal components and working principles. The model represents a single-cylinder diesel engine cutaway, allowing a clear view of internal elements, including two valves per cylinder, a piston with rings, and the engine head. Mounted on an aluminum base for durability and stability, this trainer provides a practical approach to understanding diesel engine mechanics, thermodynamics, and fuel combustion processes.

## Features

- Quarter-cutaway diesel engine trainer showcasing internal components.
- One-cylinder design with two valves per cylinder for simplified observation.
- Exposes piston, rings, cylinder head, and valve mechanism.
- Mounted on a sturdy aluminum base for easy handling and long-term use.
- Suitable for practical learning in vocational schools, colleges, and universities.
